NISHITA CHAUHAN

Data Analyst
Delhi, India · +91-9599318975 · nishitachauhan.nc512@gmail.com · LinkedIn · GitHub

Professional Summary

Data Analyst with 3+ years in enterprise BI, ERP reporting and AI data operations. Works in **SQL, Python, Power BI and Looker Studio** to build reports, automate monitoring alerts and validate data across Oracle EBS (ERP) and Noetix reporting. Currently reviews the quality of AI-generated answers for Google AI Mode, using automated scoring and root-cause analysis of poorly rated answers. Also built ML projects in churn prediction and multilingual knowledge-graph coverage.

Work Experience

HighSpring India LLP (Client: Google xWS Search Program) **Oct. 2025 – Present**
Data Analyst *Gurugram, Haryana, India*

- Scored **5,000+ AI-generated responses** (80–100 per day) for Google AI Mode using semantic-similarity checks and an AI model as automated reviewer (LLM-as-a-Judge), achieving **90%+ agreement** with approved reference scores.
- Audited Wikipedia and Ballotpedia content across **3 locales** using Gemini with Google Search fact-checking, cutting weekly audit time from **8 hours to 2 hours**.
- Investigated **300+ flagged responses per week**, tracing why answers were low quality or missed what the user was asking for, to feed model-improvement cycles.
- Published **2 Looker Studio dashboards** covering **15 operational KPIs** for **10+ stakeholders**.
- Coordinated **2 user acceptance testing (UAT) cycles** and documented **10+ data-validation defects**, with fixes adopted by the evaluation team.

Emerson Electric Co. **Feb. 2023 – Sep. 2025**
Engineer L1, Data Analyst | ERP Reporting & BI *Chandigarh, India*

- Wrote **200+ SQL queries** and supported **15+ Noetix/Oracle reporting views** across development, testing and production, covering quarterly Oracle EBS (ERP) patch cycles with **zero report downtime**.
- Delivered **10+ Power BI dashboards** with **50+ DAX measures** and row-level security (per-user data access) for **40+ stakeholders**, saving **6 hours per week** of manual reporting.
- Automated monitoring alerts in **Power Automate**, cutting data-issue detection time from **4 hours to 30 minutes**.
- Managed first-level (L1) support incidents in **ServiceNow**, investigating **100+ production data issues**, meeting SLA deadlines **95%+ of the time** and lowering recurring errors by **30%**.
- Validated **20+ release cycles** with basic release checks (smoke testing) under SOX ITGC financial-audit controls; documented Confluence runbooks and maintained **100% audit compliance**.

Projects

Ticket Routing Automation Dashboard **Emerson Electric Co.**
Power Automate, Workflow Automation

- Centralized ticket monitoring for **50+ support teams**, covering incoming volume, unassigned backlog, team-wise distribution and assignment status.
- Automated ticket routing with **Power Automate**, saving about **2 minutes of manual effort per ticket**.

Multilingual Knowledge Graph & Wiki Gap Engine | *Gemma, XGBoost, GoogleSQL / PLX, Python* **HighSpring**

- Processed **5M+ entities** across 5 areas (Film, Music, Sports, Organization, Literature), shortlisting the top **1M** by confidence to find missing language-version pages in Google Knowledge Graph.
- Wrote GoogleSQL/PLX queries (Google's internal tools) to isolate untracked entities, trained an **XGBoost model (86% accuracy)** predicting missing pages, and used Gemma to quantify a **35% content gap between languages**.

Client Churn Prediction & Retention Optimization **Live** | **GitHub**
Python, scikit-learn, XGBoost, SHAP, FastAPI, React

- Compared four prediction models on **7,043 IBM Telco records** adapted to a B2B client setting; XGBoost reached **0.915 test ROC-AUC** and **0.786 PR-AUC** (model accuracy scores). *(IBM Telco data; behavioural features simulated.)*
- Explained churn drivers with **SHAP** (feature-impact analysis), tuned decision thresholds for accuracy and cost, and ranked clients by churn risk and expected value; served single and bulk CSV predictions via a **FastAPI/React** app.

Technical Skills

Languages & Querying: SQL (GoogleSQL, PLX, Oracle), Python, Advanced Excel
BI & Reporting: Power BI, Looker Studio, Noetix, DAX, KPI Reporting, Dashboard Development
Data & Automation: Pandas, NumPy, ETL Pipelines, Azure Data Lake, Oracle Views, Power Automate, Data Validation
Analytics & AI/ML: scikit-learn, XGBoost, SHAP, AI Response Evaluation, LLM-as-a-Judge, Gemini, Root Cause Analysis
Business Analysis: Requirements Gathering, Stakeholder Management, Process Mapping, UAT
Platforms & Tools: Azure, AWS, Oracle Cloud, ServiceNow, Jira, Confluence

Education

Birla Institute of Technology and Science (BITS), Pilani **Pilani, India**
MBA – Business Analytics | ***Pursuing*** *Jun. 2025 – Sep. 2027 (Expected)*

Panipat Institute of Engineering and Technology **Panipat, India**
B.Tech – Computer Science & Engineering | ***GPA: 8.57/10*** *2019 – 2023*

Certifications & Recognition

Oracle Cloud Infrastructure Certification | Oracle
Smart India Hackathon 2020 | National-level participant
